📍 Bengaluru 560076

SUMMARY

Experienced and solution-oriented Software Developer of expertise in designing, developing, and deploying scalable web applications using Microsoft .NET technologies and modern frontend tools. Proven ability to work with cross-functional teams, integrate APIs, and maintain enterprise-grade applications. Passionate about clean code, system design, and continuous learning.

SKILLS

- Languages & Frameworks: C#, C++, Python, ASP.NET MVC, ASP.NET Core, Web API, LINQ, ADO.NET, Entity Framework.
- Frontend: HTML5, CSS3, JavaScript, jQuery, Bootstrap, React.js, ES6.
- Database: SQL Server, MySQL, MongoDB, PostgreSQL, Redis.
- Tools & DevOps: Git, GitHub, Bit bucket, TFS, Docker, Kubernetes, Jenkins, JIRA, Azure.
- Others: REST APIs, Micro services, Confluence, Unit Testing (MS Test)

EXPERIENCE

Software Engineer

Bengaluru

Fly hub Travel PVT LTD ROLES/RESPONSIBILITIES:-

04/2023 - Present

- Designed and developed features for B2B travel portal using ASP.NET Core MVC, Web API and React.js.
- Integrated multiple third-party APIs (e.g., Ethiopian Airlines, Amadeus, Ngenious Payment Gateway).
- Resolved sandbox-to-production deployment issues for Dubai and Singapore server environments.
- Collaborated on Confluence documentation and process flow diagrams.
- Wrote unit test cases using MS Test and handled CI/CD with Jenkins and TFS.
- Built dynamic, responsive UI components in React.js with ES6, Bootstrap, and Axioms for API communication.
- Collaborated with backend and UI teams to deliver seamless user experiences across desktop and mobile browsers.
- Assisted in Azure DevOps pipeline configuration for build and deployment automation, including managing release pipelines and environment variables.

Software Developer

Bengaluru

Emudhra Digital

04/2022 - 04/2023

ROLES/RESPONSIBILITIES:-

- Contributed to the development and support of EmSigner, a secure digital signing application used by enterprises.
- Worked on both desktop (WPF using XAML) and web applications (ASP.NET MVC) for enterprise document workflows.
- Designed user-friendly desktop interfaces using WPF controls, data templates, styles, and converters.
- Implemented business logic for document signing, validation, and user authentication modules.
- Consumed REST APIs in both WPF and MVC projects for secure backend communication.
- Created modular backend components using Entity Framework and LINQ for SQL Server data access.
- Wrote unit tests and supported CI/CD pipelines through TFS for reliable production releases.
- Collaborated on integrating shared RESTful APIs across both desktop (WPF) and web applications for unified document workflow and authentication services.

Delhi

ROLES/RESPONSIBILITIES:-

- Participated in the design and implementation of WMS (Warehouse Management System) project.
- Assisted in developing .NET MVC-based modules with responsive UI.
- Gained practical experience in industry-standard SDLC practices.
- Developed reusable components and contributed to code optimization efforts, gaining hands-on experience with production-grade .NET web applications.
- Demonstrated strong foundational skills in .NET and enterprise application development through hands-on exposure to real-world modules and teamwork.

I quarter Solutions (Intern)

Kolkata

11/2020- 02/2021

Intern – Developer, SLCM (Student Lifecycle Management), University Application

Role: Developer

- Enhanced existing application modules, improving performance by ~15% through optimized logic.
- Integrated new business requirements into legacy codebase with minimal disruption.
- Collaborated with teams to design and develop scalable architecture components.
- Explored and applied latest technologies to improve system functionality and user experience.
